

## OHSAS 18001 Course

A recognizable occupational health and safety management system standard against which management systems can be assessed and certified

A number of leading shipping companies mainly involved in tanker management and off-shore operations have recently been certified for the OHSAS 18001 safety and health standard.

OHSAS 18001 is an effective tool to achieve the highest levels of managing occupational health and safety in the shipping industry and is highly appreciated by key stakeholders. The common system structure allows OHSAS 18001 to smoothly be integrated in ISO 14001 and ISO 9001.

This two-day course provides insight in the OHSAS 18001 standard and what is needed for OHSAS 18001 certification. The similarities and differences with other standards -in particular the ISM Code- will be clarified.

### Target group

- > Top Management, involved in Strategic decisions and SHE-Q Staff,
- > Senior Line Management (Ship-board and Shore-based).

### Training objective

- > Get a clear picture of the OHSAS 18001 standard; its purpose, structure, philosophy and contents.
- > Obtain insight in similarities and differences with other standards, in particular the ISM Code.
- > Understand what the benefits for your organization will be if you meet the OHSAS 18001 requirements.
- > Know what is required to obtain the OHSAS 18001 Certificate for your Organization.

# OHSAS 18001 Course

A recognizable occupational health and safety management system standard against which management systems can be assessed and certified

## Course Agenda

The course comprises a two-day session covering:
